For A Logical Mind

Dear Parents,

The Chess'n Math Association is a non-profit organization that brings chess to Canadian youngsters. We offer lessons in schools, tournaments and chess camps. We are currently providing lessons for more than 10,000 children in more than 300 schools across Canada. Chess is not only a great game, it has been proven to be a valuable tool in education as well. Chess helps to stimulate concentration, memorization, imagination, problem solving and logical thinking.

Our chess teaching program has 9 levels, from beginners to advanced players. Part of every lesson is actual chess play with the instructor supervising the games and offering tips and advice. Exercise sheets are provided each week, and at the end of each course a certificate of achievement is awarded to each student.

St. Cecilia School will be offering chess lessons to students from **12:15 to 12:55pm on Thursdays** for 8 weeks, starting on **(April 11th)** and ending **(May 30th)**. **Registration closes March 30th!**

Students will have access to chess sets provided by the school for their lessons. If they would like one of their own Chess'n Math has regulation tournament chess sets available in two sizes. \$15 for small, \$25 for regulation size, delivered to students at the first class. Feel free to call or email Natasha (info above) if you have any questions.
